THE SPACE

Raising awareness of the importance of healthy soils for a healthy climate

glasgowcommunityfoodnetwork@gmail.com | www.glasgowfood.net

**Healthier soil =
healthier food**

**Healthy soils store
more carbon -
reduced CO2**

**Reduces amount of
food waste sent to
landfill - reduced
methane**

Benefits for communities and climate

**Community gardens
can reduce costs of
buying in compost**

**Helps to create 'Good
Food citizens' who are
informed and are able to
influence
decision-making
processes**

**Leads to 'Good Food
communities' where
people work together
and it's easy to make
decisions that are good
for people and the planet**

Composting for the Future - aims

1. **Normalising composting**
1. **Investigation/research**
1. **Promoting and developing community composting among organisations**
